Odd after even Linked List (HW)

1 → 3 → 4 → 5 → 8 → 10 → None

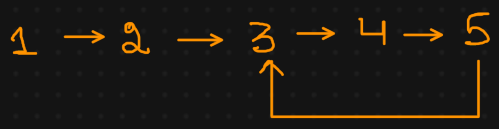

→ 4 → 8 → 10 → 1 → 3 → 5 → None

Order maintained, all odd nodes after even nodes.

Delete every N^{th} node (HW)

Reverse part of a Linked List (LC #92)

Detect cycle in a LL

Length of a Linked List cycle

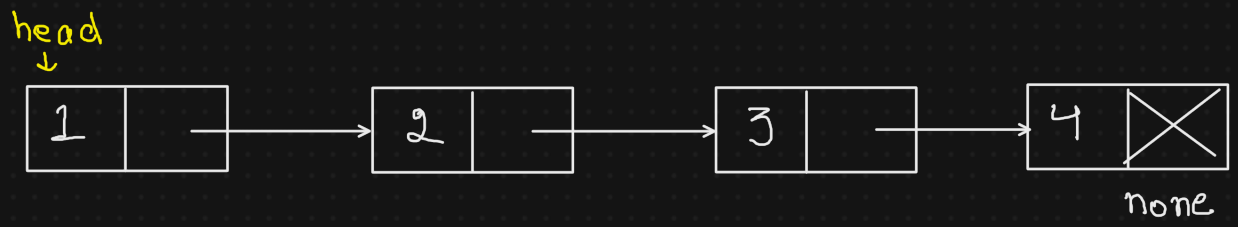

Linked list cycle begin (#142)

Palindrome LinRed list (HW)

Merge sort a LL

Types of Linked List

1. Singly Linked list :- Each node has some data and next pointer

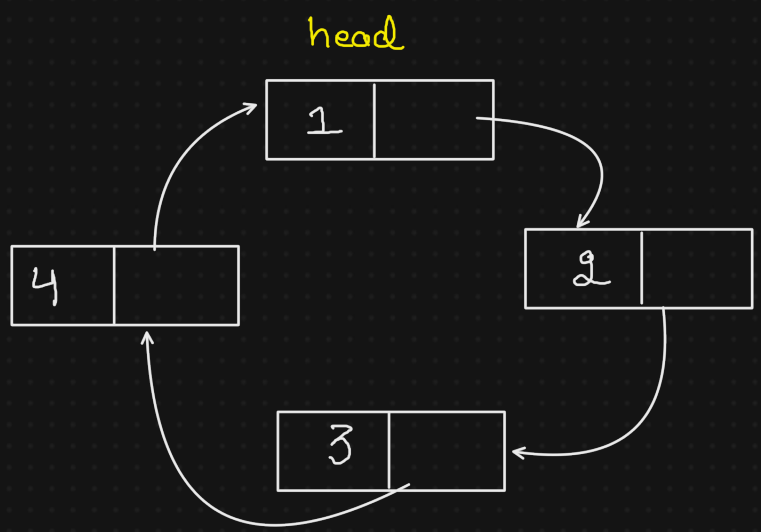

2. Doubly Linked list

Show the code and the implementation.

3. Circular Linked list

no such concept of head / tail

4. Doubly Circular Linked List
